

## Layout Plan

The main administrative building was first constructed in 1999. Construction of research buildings was continued up to 2005. Altogether 44 buildings were completed and all are one-storey buildings. Components of administrative building are offices of the director general and deputy director general, administrative office, budget and accounts division, central biomedical library, computer division, main meeting hall and two conference rooms. Moreover, there are nine research buildings. Each has the measurement of 132 ft x 52 ft x 125 ft and is bisected longitudinally into two divisions symmetrically, each division being meant for one research division. One building was specially designed for breeding laboratory animals. There are thirty five residential buildings to accommodate over 150 staff and their families. Pathology, biochemistry, parasitology, medical entomology, pharmacology, bacteriology and virology divisions are provided with up-to-date laboratory equipments. The two conference rooms are fully equipped with conference table, chairs, public address system and training aids.
